

Office 365 Email - Desktop Requirements

Microsoft Outlook

For Outlook to connect to Office 365 and function correctly you must be running one of the following version of Outlook and it must be updated to the specified service pack level. Service packs can be applied to Outlook using Windows Updates or by visiting the Microsoft Updates web page (<http://windowsupdate.microsoft.com>)

- Outlook 2007 – Service Pack 3 Required
- Outlook 2010 – Service Pack 2 Required
- Outlook 2013 – Service Pack 1 Required
- Outlook 2011 (mac) – Service Pack 3 Required

Office 365 Webmail (www.ArchBalt.org/office365)

The following browser versions are supported for accessing Office 365 email via the Internet. Some features may work in older browser versions but they are not officially supported. Visit your browser manufacturer's website to update to a supported version.

- Internet Explorer 10 & 11 – [Get latest version](#)
- Chrome 34 & 35 – [Get latest version](#)
- Firefox 28 & 29 – [Get latest version](#)
- Safari 6 & 7 – [Get latest Windows version](#)
